

19 May 2016

**Revolymer plc (“Revolymer” or “the Company”)**

**AGM Statement**

At the Annual General Meeting of the Company being held today, Dr Bryan Dobson, Chairman of the Company will make the following comments:

“Trading in the first quarter of the current financial year is in line with our expectations, and we have continued to make good progress in gaining commercial traction with our product pipeline. In the Personal and Consumer Health Care market, our new line of natural hair styling polymers, RevCare™ Natural Effects, was well received at its product launch at the Paris InCosmetics trade show in April 2016. In the Home Care and Industrial market, RevCoat™ Bond, our novel polymeric adhesion promoter for high performance sealants and adhesives, is due for launch later in the second quarter of 2016. As announced on 25 January 2016, we have also secured a renewal and expansion of our contract to supply nicotine gum in Canada, as well as contracting with a new customer in Canada.

This commercial progress follows on from our milestones in 2015, including two significant licence deals in our Home Care and Industrial business area (with Solvay and OCI). The Company is now positioned as a specialty chemicals business, focussed on controlled release, responsive systems and delivery systems that improve the functional performance of our customers’ products in two high value business areas: Personal and Consumer Health Care and Home Care and Industrial, and we have aligned the organisation so that we are best placed to penetrate these markets.

Considering the remainder of 2016 and beyond, I look forward to continued commercial milestones being achieved in both our business areas, and management remains receptive to executing corporate transactions as a route to developing the business in parallel with its ongoing organic growth.”

**Ends**
