

Revolymer™ Ltd appoints Robin Cridland as Chief Finance Officer and Company Secretary

Robin Cridland joins the Revolmyer management team

Wednesday, 24th September 2008, Revolmyer™ Ltd ('Revolmyer'), a rapidly growing polymer technology company, has appointed Robin Cridland as Chief Finance Officer and Company Secretary. Robin Cridland will work directly with the existing management team and report to Roger Pettman, Chairman and Chief Executive Officer.

Robin joins Revolmyer from Renovo Group, where he spent seven years, most recently as Executive Director Finance and Business Development. He was part of the management team that successfully took the company from a start up organisation through to IPO. Rob began his career at Coopers & Lybrand, before moving on to management roles at Enskilda Securities and Glaxo SmithKline.

Roger Pettman, CEO, Revolmyer said: "Rob's experience makes him the right person to join and complete the Revolmyer management team and to play a key role in taking Revolmyer to where we want to be. We will use Rob's expertise to help us with our continuing drive towards the commercialisation of our technology including removable gum, nicotine gum and personal care products".

Robin Cridland said: "This is an exciting opportunity to join a rapidly growing, vibrant and ever developing company within a sector where I feel I can add a great deal of value. I am delighted to have the opportunity to be part of Revolmyer, a company with very exciting times ahead."

Notes to editors

Revolmyer

Revolmyer™ LTD is a specialised FMCG polymer company which focuses on developing intelligent polymers with enhanced physical properties.

Polymers are used in everyday synthetic items including fabric, rubber and plastic. A polymer is a substance which is made up of a chain of molecules.

Revolmyer was established as a spin out company in October 2005 after scientists at The University of Bristol set out to provide a solution to products that had a secondary detrimental affect such as chewing gum removability.

It was discovered that the use of a polymer can be changed and applied to existing products to create commercial opportunities.

During 2008 Revolmyer has continued to develop at a fast, yet manageable rate, gaining £10 million worth of third round funding in May and recruiting to establish a 30 strong employee team in the past three months.
