**Revolymmer plc (“Revolymmer” or “the Company”)**

**Revolymmer signs global licence to its encapsulation technology with Solvay in the field of Sodium Percarbonate (SPC) for liquid product formulations**

Revolymmer, the polymer technology company, is pleased to announce that it has signed a further licence in its Consumer Specialties business area with the international chemicals group Solvay. Under the terms of the deal, Solvay has exclusive rights to apply Revolymmer’s encapsulation technology to the bleaching active ingredient Sodium percarbonate, known as SPC and commercialised currently by Solvay under the trademark Oxyper®, in the field of liquid formulations of laundry and automatic dish washing. Accordingly it is intended that, after final qualification, the encapsulated SPC will have improved stability enabling expansion of its application into liquid product formulations which currently do not contain such active ingredients. The geographic territory of the licence is global.

“Solvay’s strategy of improving product performance for its customers is closely aligned to Revolymmer’s own business plan, and, with Solvay’s global reach, it is the ideal partner for Revolymmer to commercialise its technology in the field of SPC products for liquid laundry and automatic dish wash. We are excited to have closed another significant global deal applying our proprietary technology with Solvay.” said Dr. Kevin Matthews, CEO of Revolymmer.

**Ends**

## **About Revolymer**

Revolymmer is an AIM quoted company (registered number 08024489) that designs, develops and formulates novel polymers to improve the performance of its customers' and partners' products. The vision for Revolymer is to build a high growth, high quality margin, specialty materials business based on proprietary polymer technology that provides responsive or smart multi-functional materials. The Board of Revolymer believes that the Company's technology has broad application. Revolymer aims to generate growing high quality revenue streams by either licensing its proprietary technologies or through the supply of proprietary products using an outsourced manufacturing model. Current target markets are Household Products, Personal Care and Nicotine Gum.
