

Revolymmer plc

Revolymmer awarded contract to supply nicotine gum

Revolymmer plc (“Revolymmer”) (AIM: REVO), the British polymer technology company, is delighted to announce that it has been awarded a contract to supply its nicotine gum to a Canadian retailer. The deal is for an initial period of 2 years and is expected to generate revenue at levels that are material to Revolymmer’s business during this period. Revolymmer has begun manufacture, and the product is scheduled to be on the shelves in Q4 2013. Under the terms of the deal Revolymmer will supply a number of stock-keeping units of nicotine gum in different flavours and formats, including a new ‘handy pack’.

“We are delighted to have been awarded this contract. This deal provides commercial validation to the application of our technologies to the nicotine gum market, and we look forward to both procuring reorders from the client and building on this achievement in other territories in due course,” said Roger Pettman Chief Executive Officer of Revolymmer.

According to Euromonitor, the global nicotine replacement therapy (“NRT”) smoking cessation aids market totalled US\$2.3 billion in 2011, of which nicotine chewing gum is the largest segment contributing 54 per cent. or US\$1.3 billion. Other smaller categories include inhalers, lozenges and patches. Between 2006 and 2011 the global NRT nicotine gum market grew at a CAGR of 3.8 per cent.. Europe (including Eastern Europe) accounted for 40 per cent. and North America 43 per cent. of this market in 2011. About a fifth of the nicotine gum market worldwide is accounted for by private or white label products, with the balance from global brands such as Nicorette and Nicotinell.

About Revollymer

Revollymer is a technology company that designs, develops and formulates novel polymers to improve the performance of existing consumer products within the fast moving consumer goods (FMCG) and other industrial markets. Revollymer aims to generate significant and growing high quality revenue streams by licensing its unique technologies to manufacturers and marketers within these markets. Potential applications for the business's technologies are in the household products, personal care and coatings & adhesives product areas (together "Consumer Specialties") and in medicated chewing gum (including nicotine gum) and confectionery chewing gum (together "Gum").
