

NEWS RELEASE

Revolymer renews commitment to North Wales with new Flintshire site

25 July 2011 - Revolymer®, the revolutionary polymer company, is pleased to announce the opening of its new Flintshire site in Newtech Square, Deeside Industrial Estate. The move reinforces the company's commitment to the county as they will be moving from Dock Road in Mostyn, where they have been based since 2006.

The new site allows the company the opportunity to expand its operations and build upon the business's significant growth since its founding in 2005. The new site is being leased from Flintshire County Council, who has proved to be a strong partner in helping grow the business locally.

Chief to Revolymer's® commercial success so far, has been the launch of the company's REV7 removable and degradable gum. The gum, already on sale in close to 500 stores in the United States, is a revolutionary product that uses Revolymer's® patented polymer technology to produce a great tasting gum can be removed readily from clothes using soap and water, and tests have shown that more than 50% can be removed by conventional street cleaning; with any gum washed into the drains degrading into minerals, biodegradable products and inert materials.

Considering that 50% of gum finds its way onto UK streets and at a cost of over £150m a year for local councils to remove, Revolymer® technology is solving a very costly and challenging problem.

Roger Pettman, CEO of Revolymer® said: "We are very happy with the new site and the ability to renew our commitment to Flintshire. Having been based here since 2006, we have seen a period of substantial growth that has transformed us into a global business and now have the opportunity to grow the business even further whilst remaining in North Wales."

Notes to Editors:

1. In testing Revolymer® found that its confectionery gum removes readily from a range of surfaces (including paved sidewalks, carpets, textiles, transport fabrics and clothing materials), and disintegrates into a fine powder within 6 months using mild agitation in water. See www.revolymmer.com for more details.
2. Revolymer® is a rapidly growing technology development company which has developed a unique portfolio of products and formulations for the FMCG industry. Using commercially available and inexpensive polymers, Revolymer® applies its innovative proprietary approach to formulate novel polymers to revolutionise consumer products. Current applications for the Company's technology are in the Confectionery Chewing Gum, Medicated Chewing Gum, Household Products, Personal Care and Coatings & Adhesives sectors of the FMCG industry

The address of Revolymer's new site is:

REVOLUTIONARY POLYMER SOLUTIONS

1 Newtech Square, Zone 2,

Deeside Industrial Estate,

Deeside,

Flintshire

CH5 2NT, UK.
